

VICTOR MUNENE

Information Science Graduate & ICT Professional

viciruria@gmail.com | github.com/vic-munene | Eldoret, Kenya

PROFILE

Information Science graduate with an IT specialisation and hands-on ICT experience spanning networking, systems administration, information security, and software development. Practical background in real-world infrastructure deployment and support, paired with academic grounding in information systems, security, and human-computer interaction. Seeking to apply a broad technical foundation to systems administration, IT support, or entry-level software/security roles.

WORK & ATTACHMENT

ICT Attachment Intern 2026

Moi University College of Health Sciences — ICT Department · Kenya

Carried out hands-on technical duties in a live institutional ICT environment including preventive maintenance, system diagnostics, network provisioning, infrastructure deployment, peripheral configuration, device integration, and connectivity testing.

EDUCATION

BSc. Information Science (IT Specialisation) 2022 – 2026

Moi University · Kenya

Degree programme with a specialisation in Information Technology. Coursework spanning Information Systems Security & Audit, Distributed Systems, Human-Computer Interaction, Records & Archives Management, Radio & Television Communication, and Library & Information Science.

Diploma in Information Technology 2018 – 2021

Jomo Kenyatta University of Agriculture and Technology (JKUAT) · Kenya

Foundation studies in Information Technology, culminating in a practical diploma project — a Restaurant Management System. Built core knowledge in computing, systems, and software development.

ACADEMIC PROJECTS

Anonymous Reporting & Student Wellbeing System 2024

Degree final project — a platform enabling students to submit anonymous reports on wellbeing concerns, misconduct, or campus issues, focused on privacy, usability, and institutional safety. Drew on coursework in HCI, information systems security, and systems design to balance usability with data protection.

Restaurant Management System 2022

Diploma final project — a full management system for restaurant operations covering order management, inventory tracking, and billing, built on a relational database structure with a straightforward staff-facing interface.

TECHNICAL SKILLS

- Networking & Connectivity: Network provisioning, TCP/IP, Cisco Packet Tracer, connectivity testing, infrastructure deployment
- IT Support & Hardware: Preventive maintenance, system diagnostics, peripheral configuration, device integration
- Information Security: CIA Triad, risk management, cryptography, incident handling, IS auditing, disaster recovery
- Information Systems: Distributed systems, OPACs, DSpace, Z39.50, OAI-PMH, KENET infrastructure
- Cloud & Systems Admin: Cloud technologies, systems administration, infrastructure management
- Software & Development: System design, problem solving, database-driven application development

CERTIFICATIONS

- ICDL Certification — Alphax College (International Computer Driving Licence)
- Getting Started with Cisco Packet Tracer — Cisco Networking Academy
